

**EEOC**

*Earth Environment Observation Committee*

International Workshop on Spaceborne Lidar 1995  
- Technology and Applications -

**Proceeding**

*Organized by*  
*Earth Environment Observation Committee (EEOC)*  
*National Space Development Agency of Japan (NASDA)*

*Chaired by*  
*Kazuhiro Asai (Tohoku Institute of Technology)*  
*Takashi Moriyama (Earth Observation Research Center, NASDA)*

**October 24 - 26, 1995**  
**Nara Prefectural Culture Hall**  
**Nara, Japan**

## Contents

### 1. Abstracts and Viewgraphs

Opening Session -----	1
K. Asai (Tohoku Institute of Technology)	
Earth Observation Long Term Scenario in Japan -----	4
T. Igarashi (National Space Development Agency of Japan)	
What will we see from space using a Mie lidar ? -----	16
Y. Sasano (National Institute of Environmental Studies)	
Spaceborne Cloud and Aerosol Information for Climate Research -----	29
E. Raschke (GKSS Research Center)	
Implications of Three Dimensional Cloud/Aerosol Measurement in the Climate Change Issues --	53
T. Nakajima (Center for Climate System Research, University of Tokyo)	
Small Satellite System for Technology Demonstration -----	64
T. Hidaka, Y. Kawada, A. Noda, T. Fujita (National Space Development Agency of Japan)	
Conceptual Study and Near Future Plan of Space LIDAR -----	78
N. Tanioka, S. Ishii, A. Tuiki, Y. Yamamoto	
(National Space Development Agency of Japan)	
LITE : The First Atmospheric Lidar Measurements from Space -----	91
D.M. Winker and M.P. McCormick (NASA Langley Research Center)	
LITE Observations of Biomass Burning Over South Atlantic Basin -----	121
E.V. Browell, W.B. Grant (NASA Langley Research Center)	
G.D. Nowicki, M.A. Fenn (Science Applications International Corp.)	
R.M. Hoff (Atmospheric Environment Service)	
Cloud Inhomogeneity and Shortwave Radiation Budget -----	142
T. Hayasaka (Center for Atmospheric and Oceanic Studies, Tohoku University)	
Overview of the Studies Conducted in France to Assess the Benefit of a Space Based Backscatter Lidar for a Radiation and Climate Watch Mission -----	154
P.H. Flamant (Laboratoire de Meteorologie Dynamique du CNRS)	
J. Pelon (Service d'Aeronomie du CNRS)	
Need of 3-D Polar Cloud Climatology for Earth Radiation Budget Study -----	191
T. Yamanouchi (National Institute of Polar Research)	
Utility of Spaceborne Lidar Data for Cloud Studies in Climate Research -----	212
G.L. Stephens (Department of Atmospheric Science, Colorado State University)	
Future Spaceborne Lidar Systems -----	237
T. Kobayashi (Fukui University)	

Developments of All Solid-state Laser and Optics for Airborne and Space Lidar Systems	-----	256
K. Tatsumi, Y. Hirano (Mitsubishi Electric Corporation)		
N. Tanioka, S. Ishii (National Space Development Agency of Japan)		
Conductively Cooled LDP Nd:YAG Laser for Spaceborne Lidar System	-----	271
T. Ishii, T. Hotta, H. Kubomura, T. Araki, K. Nakajima, H. Imoto, R. Kameyama		
(NEC Corporation)		
N. Tanioka, S. Ishii (National Space Development Agency of Japan)		
Space LIDAR Activity in Toshiba	-----	284
K. Tsuno, Y. Kameda (Toshiba Komukai Works)		
M. Nakayama, E. Koike (Toshiba Manufacturing Engineering Research Center)		
Development of Water Vapor DIAL	-----	293
O. Uchino (Japan Meteorological Agency)		
T. Nagai, T. Fujimoto (Meteorological Research Institute)		
C. Nagasawa, M. Abo (Tokyo Metropolitan University)		
T. Nakajima (National Space Development Agency of Japan)		
K. Tatsumi, Y. Hirano (Mitsubishi Electric Corporation)		
Advanced Airborne DIAL Systems, Their Measurements and Plans for Future Spaceborne DIAL Missions	-----	308
E.V. Browell, S. Ismail, W.B. Grant, N.S. Higdon (NASA Langley Research Center)		
A. Dudelzak (Space Technology Division, Canadian Space Agency)		
Shuttle Laser Altimeter: A Pathfinder for Space-Based Laser Altimetry and Lidar	-----	333
J.L. Bufton (NASA Goddard Space Flight Center)		
Spaceborne Lidar "ALISSA" for Orbital "MIR" Station	-----	349
G. Tulinov (Institute of Applied Geophysics), V. Melnikov (RKK Energia)		
M. Gitkova (NPO Polus), M.L. Chanin, C. Malik (Service Aeronomy)		
M. Desbois (LMD-Ecole Polytechnique)		
Feasibility Study for Atmospheric Water Vapor Measurements from Spaceborne DIAL	-----	366
C. Nagasawa, M. Abo, T. Sugisaki (Tokyo Metropolitan University)		
O. Uchino (Japan Meteorological Agency)		
Closing Remark	-----	371
T. Itabe (Communication Research Laboratory)		
2. Participants List	-----	373
