

International Workshop on Spaceborne Lidar 1996
- Technology and Applications -

Proceeding

Organized by
National Space Development Agency of Japan
Earth Science & Technology Forum/Earth Science and Technology Organization

Chaired by
Yasuhiro Sasano (National Institute of Environmental Studies)
Yukio Haruyama (Earth Observation Planning Department, NASDA)

December 16 - 18, 1996
Hakone Hotel Kagetsuen
Hakone, Japan

Contents

Project for Earth Environment Observation in NASDA

T. Igarashi (National Space Development Agency of Japan)	1
--	---

Contribution of a Space-borne Backscatter Lidar

to Earth Radiation Budget and Surface Flux Climatology

J. Pelon (Service d'Aeronomie du CNRS)	9
--	---

LITE

C. M. R. Platt (CSIRO, Division of Atmospheric Research)	37
--	----

SLA

J. Spinhirne (NASA Goddard Space Flight Center)	55
---	----

NASA's Geoscience Laser Altimeter System Mission

J. Spinhirne (NASA Goddard Space Flight Center)	65
---	----

Global Tropospheric Aerosols

Y. Iwasaka (Nagoya University)	85
--------------------------------------	----

Laser Safety and Accidental Laser Injuries to the Eye

T. Nishisaka (Japan Advanced Institute of Science and Technology, Hokuriku)	113
---	-----

Eye Safety for Space Borne Lidar

J. Spinhirne (NASA Goddard Space Flight Center)	123
---	-----

Eye-Safety

A. E. Marini (ESA European Space Research and Technology Center)	129
--	-----

Eye Safe

N. Tanioka (National Space Development Agency of Japan)	133
---	-----

Overview of NASDA MDS-LIDAR Program

N. Tanioka (National Space Development Agency of Japan)	137
---	-----

Development of NASDA MDS-LIDAR

T. Imai (National Space Development Agency of Japan)	157
--	-----

ALISSA

J. Pelon (Service d'Aeronomie du CNRS)	177
--	-----

Roles of Clouds and Aerosols in Climate Change Processes	
T. Nakajima (University of Tokyo)	189
MDS-lidar scientific mission	
Y. Sasano (National Institute for Environment Studies)	211
Observation Strategy	
K. Shimizu (Science University of Tokyo)	225
Overview of Atmos-B1	
T. Takamura (Chiba University)	235
ATMOS B1 Lidar	
T. Itabe (Communications Research Laboratory)	255
Cloud Profiling Radar for Cloud Radiation Study	
H. Kumagai (Communications Research Laboratory)	267
Some Issues on Microwave Remote Sensing of Clouds	
H. Hayasaka (Tohoku University)	279
Spaceborne lidar technology developments at the European Space Agency	
A. E. Marini (ESA European Space Research and Technology Center)	295
Space-borne Backscatter Lidar an operational tool for weather forecast and climate Research	
W. Renger (DLR, Institut fuer Physik der Atmosphare)	317
The Interactions of Clouds and Radiation :Retrieval of optimum parameters from space lidar and radiometry	
C. M. R. Platt (CSIRO, Division of Atmospheric Research)	339
Clouds-Radiation Study in the JACCS/MRI Program	
S. Asano (Meteorological Research Institute)	361
Multiple Scattering from Cirrus Clouds :A Fast Approach to Retrieve Optical Characteristics of the Atmosphere from LIDAR Returns	
W. Renger (DLR, Institut fuer Physik der Atmosphare)	383
Multiple Scattering Effects in Space LIDAR	
C. M. R. Platt (CSIRO, Division of Atmospheric Research)	399

Multiple Scattering Effects on Space Borne Lidar	
J. Spinhirne (NASA Goddard Space Flight Center)	413
On the Multiple Scattering Contribution	
in Backscattered LIDAR Signals for Spaceborne Observations	
J. Pelon (Service d'Aeronomie du CNRS)	421
Monte Carlo Simulations for Spaceborne Lidar	
T. Kobayashi (Meteorological Research Institute)	431
Observation of Multiple Scattering effect in Clouds by a Dual FOV	
Polarization and Raman Lidar from Ground	
T. Murayama (Tokyo University of Mercantile Marine)	445
Closing Remarks as summary	
K. Asai (Tohoku Institute of Technology)	463
Participants List	513
